

Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS.

Aim :

To design and develop a simple cloud-based Flight Reservation System using Zoho Creator as a Software as a Service (SaaS) platform, enabling users to book, view, and manage flight reservations online.

Procedure :

1. Logged in to Zoho Creator using a Zoho account.
2. Created a new application named Flight Reservation System.
3. Designed a form to enter passenger and flight details.
4. Added required fields such as passenger name, flight number, source, destination, and travel date.
5. Created a workflow to automatically set the booking status when a reservation is made.
6. Generated reports to view all reservations and booked flights.
7. Deployed the application on Zoho Cloud and accessed it through a web browser.
8. Tested the application by entering sample flight reservation data.

Output :

The screenshot shows a web-based form titled "Flight_Reservation_Form" within a browser window. The form consists of several input fields: "Passenger_Name" (text input), "Email" (text input), "Phone_Number" (text input with a dropdown for country code "+91" and a placeholder "81234 56789"), "Flight_Number" (text input), "Source" (dropdown menu), "Destination" (dropdown menu), "Travel_Date" (text input with a placeholder "dd-MM-yyyy"), "Seat_Class" (dropdown menu), and "Booking_Status" (dropdown menu). The browser's address bar shows the URL "https://www.zoho.com/creator/applications/Flight_Reservation_System/Flight_Reservation_Form.html". The top right of the browser window displays a trial expiration notice ("Trial expires in 15 days") and upgrade options.

The screenshot shows a web browser window with the Zoho Creator interface. The title bar reads "Flight Reservation System". The main content area is titled "Flight_Reservation_Report". A table is displayed with the following data:

Passenger_Name	Email	Phone_Number	Flight_Number	Source	Destination	Travel_Date
Aasritha Thalamati	thalamatiaasritha@gmail.com	+917010900174	AI-203	Chennai	Delhi	10-Jan-2026

Result :

A cloud-based Flight Reservation System was successfully created and deployed using Zoho Creator. The application allows users to enter passenger and flight details, make reservations, and view booking information through a web browser. The system is hosted on the cloud and requires no local installation, thereby successfully demonstrating the Software as a Service (SaaS) model.
